

Brian Bader's species list for Oak Savanna and Oak Woodland Restoration

The following list was published by Brian Bader in 2001. At that time he was at the University of Wisconsin Arboretum. It is based on extensive work at the Arboretum, starting with that of Virginia Kline, the Arboretum Ecologist, plus additional information provided by other Arboretum staff, and an extensive review of the available literature.

Also consulted were extensive historical records and published work not only from Wisconsin but from Iowa, Illinois, and other states. The original savanna list was expanded to include species of the closed canopy oak woodland, and wet-mesic and lowland savanna habitats. The extensive list of Carex species was added by Andrew Hipp.

The complete citation of this work is as follows:

Bader, Brian J. 2001. Developing a species list for oak savanna/oak woodland restoration at the University of Wisconsin-Madison Arboretum. *Ecological Restoration*: Volume 19, number 4, pp. 242-250.

An Excel file of the complete database was made available to me and has been used to produce the present digital file.

Abbreviations for the Headings are as follows:

SH = Shade
PS = Partial shade
SU = Full sun
W-M = Wet-mesic
D-M = Dry-mesic
Ca = Calcareous
LP = Limestone prairie

* = Species listed by the Wisconsin Department of Natural Resources as endangered or threatened.

1 = Species with restricted ranges in southern Wisconsin
